GRIPA Connect Clinical Integration

Physician Achievement Report (PAR)

Provider: [Redacted]
Data last updated: 11/15/2009
Report Date: 11/15/2009

For detailed reporting for the Clinical Integration program a baseline performance of the entire panel of participating providers and services is needed to identify and help to increase quality and efficiency. The Physician Achievement Report (PAR) allows individual providers to see how they perform relative and how the physician contributes to the performance of the network.

GRIPA's Diabetes Care Management Services

- Diabetes Outcomes: RGHS employees/dependents
 - » Engaged: 18 patients from 1/09 to 9/30/09
 - » Alert: A1c in the last 6 months
 - Day of enrollment: 72% of patients compliant
 - 9/30/09: 94% of patients compliant
 - » Potential Alert: A1c >8%, A1c within the last 3 months
 - Day of enrollment: 31% of patients compliant
 - 9/30/09: 78% of patients compliant
 - » A1c: Average reduction is 1%
- Care manager's involvement with these patients is coordinated with the patient's physicians and the physician's care plan
- GRIPA CMS can help to improve process measures and in turn improve performance measures

CI Demonstration Project

- *Challenge:*
 - » The GRIPA Connect Portal shows our current A1c testing rate for diabetics is 63%
 - » Our goal is 80% of our patients have at least 1 A1c every 6 months
- *Goal:*
 - » To increase the rate of A1c testing for up to 50 non-compliant diabetics in a two month period
- *Benefits to you, your practice and your patients*
- Currently, there are 36 physicians participating in this project
